PROFESSIONAL SUMMARY

Results-driven Front-End Developer with 2+ years of experience building scalable Angular applications for enterprise clients. Proven track record delivering complex, real-world products — from real-time dashboards and legacy migrations to full flight-booking platforms with payment integration. Brings a full-stack perspective (Angular + .NET) and a strong eye for UI/UX, performance, and cross-functional collaboration.

PROFESSIONAL EXPERIENCE

Front-End Developer (Angular) — [Sheen Information Technology](#) Oct 2024 – Present

- ▶ Led front-end development of Fly WT, a full-scale bilingual flight booking platform built from scratch, covering flight search, seat selection, booking management, and local payment gateway integration.
- ▶ Architected and delivered reusable Angular component libraries and services following DRY principles, adopted across multiple product lines to ensure consistent design and accelerated feature delivery.
- ▶ Spearheaded migration from legacy AngularJS to Angular 16+, improving application performance, maintainability, and alignment with modern best practices — directly reducing bug rates in migrated modules.
- ▶ Contributed to Agile ceremonies (sprint planning, daily stand-ups, code reviews, retrospectives), consistently delivering high-quality features on schedule.

Front-End Developer (Angular) — [Tilde Technology](#) Aug 2023 – Oct 2024

- ▶ Developed and maintained multiple Angular-based applications for e-commerce and product management use cases, with a strong focus on mobile-first UI and performance optimization.
- ▶ Built and shipped ElZatoonah, a price-comparison mobile app (Ionic), contributing to feature development, critical bug fixes, and UI enhancements that improved user experience.
- ▶ Collaborated directly with designers and backend engineers to translate business requirements into clean, maintainable front-end code across multiple concurrent projects.
- ▶ Maintained and extended legacy AngularJS codebases, fixing critical bugs and implementing new client-requested features with minimal disruption to existing functionality.

PROJECT HIGHLIGHTS

Fly WT — *Full-scale bilingual flight booking platform* — [Sheen Information Technology](#)

- ▶ Built the entire front-end from scratch using Angular and Tailwind CSS, delivering a production-ready flight booking system covering search, seat selection, booking management, and payment flow.
- ▶ Integrated a local Egyptian payment gateway, handling the full transactional flow end-to-end within the Angular application.
- ▶ Implemented full bilingual support (Arabic & English) with RTL layout switching, ensuring a seamless and accessible experience for all users.
- ▶ Applied CMS integration and SEO best practices to maximize content flexibility and organic discoverability of the platform.

Money Collector — *Real-time agency management dashboard* — [NDC](#)

- ▶ Led front-end development using Angular 18 and Tailwind CSS, delivering a modern responsive UI managing agency balances, wallets, and top-ups for field operations.
- ▶ Integrated Google Maps for live agent tracking and SignalR for real-time communication, enabling instant visibility across distributed field teams.
- ▶ Delivered key modules: Dashboards, Reports, Wallet Management, OTP, Activation Codes, Roles & Permissions, and a Commenting System.

NDC Uplift — *Full front-end rebuild — Wonder Travel B2B*

- ▶ Rebuilt the entire NDC front-end from scratch in Angular 16, modernizing the UI/UX and system architecture while maintaining full functional parity with the legacy platform.
- ▶ Reduced technical debt significantly by adopting the latest Angular design system patterns, improving load times and long-term maintainability.

Price Hunter — *Ionic product management application*

- ▶ Designed and built the app from scratch using Ionic, delivering a scalable admin tool capable of managing thousands of product records with add, edit, and sync functionality.
- ▶ Engineered reusable component architecture to handle high data volumes without performance degradation.

TECHNICAL SKILLS

Core:	Angular, TypeScript, JavaScript, Tailwind CSS, Bootstrap, Ionic
Familiar:	React, Next.js, Material UI, React Native
Back-End:	C#, .NET Core, ASP.NET, RESTful APIs, SQL
Familiar:	Node.js, Express.js, MongoDB
Other:	SignalR, Google Maps API, CMS, RTL/i18n, SEO, Git, Agile/Scrum

EDUCATION

Bachelor of Computer Science — [Benha University](#) 2017 – 2021

CERTIFICATIONS

- ▶ .NET Development — Route Academy (2025)
- ▶ Angular — Udacity (2023)

CORE COMPETENCIES

Agile Mindset • Cross-functional Collaboration • Problem Solving • Technical Communication • Time Management • Continuous Learning
